

City of Kingston Convicted

Janet Fletcher a Clinical Secretary swore charges against the City of Kingston regarding polluting a water course. It seems that Kingston had this old dump that they turned into a recreational area (sound familiar?). Due to the cavalier way the city handled this property leaching took place and it was this poisoning of the water way which prompted the charges. Check out the PDF file it is amazing how similar Orillia's problem is to Kingstons. Hey maybe we can charge the mayor, council and city staff seeing that 78 million liters of pollutants is leaching into Simcoe every year from the dumpsite?
